

Dear Friends,

Fortune telling, or future forecasting, is based on reading the probabilities of change. Most adults are set in their habits, so until some great obstacle presents itself, they will choose the same choice, complain about the outcome, and choose the same choice again.

But, every once in a while, that insurmountable obstacle appears. And suddenly the same choice simply isn't available. The same path cannot be trod.

When a multitude of people are suddenly faced with an insurmountable obstacle (COVID, earthquake, fire) this same multitude has to make different choices. As a result the rest of humanity is nudged, or sometimes pushed, into a new path that leads and encourages them away from choosing the same old choice.

After an obstacle appears in our life, we have a special choice. We can move forward in a new direction with wonderment about what each new step might bring, or curse the newness and use all of our energy to focus on returning to the old patterns.

This is a time in the yearly cycle of darkness and stillness. It is now that we can listen within and hear whether we are trying to somehow ascend and conquer the obstacle, allowing us to make the same choices as before, or if we have begun our new journey.

I am convinced that the congregation of Souls incarnating into Earth is wanting a new path.

Thus what appears to be devastating is an opportunity to make new choices, prioritize differently, and open a new doorway for all of humanity.

May we each listen, and help write a new future based on new choices.

Blessings in the New Year to all of us,

-Norma
