An experiential afternoon using toning, personal intention and chant for healing in the physical, mental and emotional bodies. Includes touching upon medieval healing chants (Hildegard of Bingen), mantras and simple toning, as well as engaging and deepening your own energetic awareness of how sound heals. Open to all.

No musical experience is needed to gain skills from this workshop, although beginners may find moments where the information is focused on an advanced version of the technique being shared. Musicians, singers and energy workers will find specific information and tools that can be used in their own singing/performing/group sounding/healing practice.
